

SRP HOME ENERGY ASSESSMENT PROGRAM

Effective May 1, 2022–April 30, 2023

Delivering water and power®

BECOME A SMART ENERGY SAVER WITH A FREE HOME ENERGY ASSESSMENT*

With a free in-home or Virtual Home Energy Assessment, you'll receive a comprehensive report on your home's energy performance and learn ways to become energy smart, improve the comfort of your home and lower your monthly energy costs. Your Home Energy Assessment includes customized energy-saving products to optimize your energy use.

THREE STEPS TO SAVE

A Home Energy Assessment only takes about 90 minutes, depending on the size of your home. Here's how it works:

1. Visit srpnet.com/hea or call **(602) 236-3065** to schedule your free Home Energy Assessment. You will need to provide your SRP account number, which you can find on your bill or online at myaccount.srpnet.com/power.
2. A specially trained SRP Energy Ambassador will complete an assessment of your home's appliances, lighting and heating and cooling equipment. During the assessment, your Energy Ambassador will customize a list of energy-saving products for your home. If you have a virtual assessment, these items will be shipped to you 1 to 2 weeks following your assessment. If you have an in-home assessment, the Energy Ambassador will install these items for you.
3. At the end of the assessment, your SRP Energy Ambassador will send you a personalized Home Energy Assessment Report. The report will contain expert insight on how your home uses energy, recommended improvements and rebate eligibility.

RENTERS CAN SAVE TOO

You don't have to own a home to be eligible for an SRP Virtual Home Energy Assessment. If you live in a complex that has five units or fewer, talk with your

property manager about why you'd like to have your home assessed. Once you have their approval, visit srpnet.com/hea to schedule your free Virtual Home Energy Assessment.

YOUR ENERGY-SAVING PRODUCTS MAY INCLUDE:

- Up to 25 ENERGY STAR® certified LED dimmable bulbs
- Up to two LED nightlights
- Up to two efficient-flow showerheads
- Up to four bathroom faucet aerators
- One kitchen faucet aerator

YOU MAY QUALIFY FOR ADDITIONAL APPLIANCE REBATES†

Your Home Energy Assessment Report will also tell you about any SRP appliance rebates you may qualify for based on your current appliances. To qualify for a rebate, you must have a Home Energy Assessment, so don't buy any new appliances just yet.

Our Energy Ambassadors will help you identify and prioritize the appliances that will offer you the greatest energy savings. You may receive rebates for replacing a qualified refrigerator, heat pump, water heater, washer, dryer or dishwasher with new ENERGY STAR certified appliances.

The Energy Ambassador will also provide information on other SRP rebates for things like air conditioners, insulation and duct sealing.

Visit srpnet.com/hea or call **(602) 236-3065 today to schedule your free Home Energy Assessment and learn ways to become energy smart, improve the comfort of your home and lower your monthly energy cost.**

*All virtual assessments are free. In-home assessments are free for income-qualified customers who are eligible for the Low-Income Home Energy Assistance Program; Special Supplemental Nutrition Program for Women, Infants, and Children; or Supplemental Nutrition Assistance Program. If you do not participate in any assistance programs, there will be a \$49 fee for the assessment. This fee will be added to your SRP bill after the assessment is completed.

†Customers will have 6 months to apply for a rebate after the SRP Home Energy Assessment is complete.
